Penlon Medical Rail System

SUCTION & OXYGEN THERAPY SOLUTIONS

Penlon Medical Rail System comprises of aluminium rail, plastic insert strip and end caps and is suitable for all wall mounting and mobile trolley applications

- ◆ Strong aluminium construction able to support any device designed for rail mounting
- ◆ Complements Penlon's rail accessories range
- ◆ Profile accommodates all commonly used rail clamp systems
- ◆ Cost effective alternative to Bedhead trunking
- ◆ Trolley mounted system for resuscitation and ICU/CCU applications also available
- ◆ Mounts directly on the wall, using standard fixings

The alternative to bedhead trunking

Medical Rail at the patient bedhead is a cost effective mounting system for medical equipment and the provision of patient therapy treatment

Flexible equipment placement - Services and equipment can be relocated easily.

Repair and maintenance - Instant access to equipment and services for repair and maintenance

Rail Lengths

This versatile medical rail system is available in standard lengths (one, two or three metres), or in customer specified lengths (up to three metres)

NOTE Joining rods are required for rail runs over 3 metres in length

Loading and Support

Recommended mounting centres	0.6 m
Maximum load	360 kg
Maximum torque	100 Nm

The rail loading must be reduced if it is necessary to position rail mounts significantly further apart than the recommended distance.

NOTE

- 1 Installation must be carried out by a competent installer, who will supply screws and other fixings to suit site conditions
- 2 It is the responsibility of the customer to ensure that the supporting structure is adequate to take the expected imposed loads and to alter the mounting point centres if appropriate

Rail Mounted Accessories

Increase functionality and performance with our range of rail mounted equipment and accessories

- 1 **Therapy Flowmeters**
Rail mounted oxygen and air therapy flowmeters .
- 2 **Aneroid Sphygmomanometer**
Rail mounted aneroid sphygmomanometers with velcro cuff
- 3 **Catheter Holder (Two or Five Bay)**
2 or 5 bays box catheter holders (rail or V-plate mounting).
